

Linguistics 3C03
Verb Learning Task Instructions & Answer Sheet
Group 4

In this experiment, we are interested in finding out how well adults can identify words by observing the contexts in which they are used.

You will see a sequence of pictures labeled with mystery verbs. Each mystery verb was being used in a sentence spoken by the adult in the picture at the moment the picture was taken. In addition to these pictures, you will see the sentence that contained the mystery verb.

First, you will have a chance to observe the visual and linguistic contexts in which each of the mystery verbs was used. You'll have ten seconds to view the context for each instance of the verb.

After you've viewed the contexts, you'll see one additional context for each mystery verb, for 20 seconds each. During these final contexts, you should make your guess about what each verb is. Write your guesses in the table below.

So that everyone's results will be comparable, please watch the mystery verb video only once!

Mystery Verb	My Guess
blick	
grek	
flurb	
pim	
jarn	
lorp	

Once you've finished the video and written down your guesses, follow the link on Avenue to enter your guesses into the data collection form.
